

# Training on Project Management

## Training overview

Managing projects is one of the most challenging issues especially in the emerging economy like Bangladesh. A project is a one-time activity that produces a specific output and or outcome. Every project is unique and for that project management is a complex issue and requires in-depth practical knowledge to deliver a successful project. Effective project management ensures economy, efficiency and effectiveness of the project. A well-trained project manager can deliver a successful project. This course contains 13 modules, is designed ensuring project success through proper project management.
